

ANANTHI S

SENIOR WEB DEVELOPER

ananthi1712@gmail.com | +91 9004636074 | Mumbai, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Accomplished Web Developer with 7+ years of experience designing, developing, and maintaining responsive, SEO-optimised, enterprise-grade websites and corporate web platforms. Expertise includes HTML5, CSS3, JavaScript, jQuery, Bootstrap, PHP, MySQL, and CMS platforms such as WordPress, Shopify, Adobe Experience Manager (AEM), and Drupal. Proven track record delivering onsite enterprise engagements for PwC India and Angel Broking, full-cycle agency projects for 20+ clients, large-scale WordPress Multisite revamps, custom registration/login modules, and interactive campaign micro-applications. Strong background in cross-browser responsive development, on-page SEO and page-speed optimisation, production support, and Agile collaboration within small cross-functional teams.

CORE SKILLS

Front-End Technologies: HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap 4/5, Responsive & Mobile-First Design, Cross-Browser Compatibility, AJAX, JSON, PSD/Figma to HTML, Responsive HTML Emailers

CMS & Platforms: WordPress (theme-based, child themes, Multisite), Shopify (Liquid, sections, theme customisation), Adobe Experience Manager (AEM) — page authoring, templates, content fragments, DAM

Back-End & Databases: PHP, CodeIgniter (MVC), MySQL, custom form/mail handling, session & role-based access, Java (basic)

SEO & Web Optimisation: On-page SEO, meta title/description & OG tag management, semantic markup, sitemap/robots, content updates, image & asset optimisation, page-speed improvement

Production & System Support: E-KYC support & maintenance, ECOM platform troubleshooting, WAR file deployments, UAT & Production environment support, audit evidence support

Tools & Version Control: Git, GitHub (basic)

Soft Skills: Time management, problem-solving, client coordination, team collaboration, self-motivated, deadline-driven

PROFESSIONAL EXPERIENCE

Web Developer — Futuready Media Private Limited, Mumbai

Jul 2023 – Present

Project: PwC India Corporate Website ([pwc.in](https://www.pwc.in))

Technology: Adobe Experience Manager (AEM), HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Continued AEM-based web development and page management for PwC India's corporate website as part of an ongoing client engagement.
- Authored, created, and revamped web pages using AEM components, templates, and content fragments.
- Built creative layout blocks for campaign, service, and industry pages using existing AEM components and custom HTML/CSS/JS.
- Developed responsive HTML/CSS/JS layouts and integrated them into AEM for consistent rendering across desktop, tablet, and mobile.
- Managed page properties, metadata, and on-page SEO elements including meta titles, descriptions, and OG tags.
- Handled content data dumps, bulk page updates, and DAM asset management for large content releases.
- Coordinated with marketing, design, and content stakeholders to deliver pages within tight publishing deadlines.
- Performed cross-browser testing, defect fixing, and post-publish validation on authoring and production instances.

Project: Pricewaterhouse.in — PwC India Microsite (Figma to AEM)

Technology: Figma to AEM, Adobe Experience Manager (AEM), HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Developed a standalone microsite for PwC India by converting the approved Figma design into pixel-accurate, fully responsive templates in AEM.
- Customised the header and footer sections using JavaScript/jQuery in line with the Figma design.
- Implemented semantic markup, heading hierarchy, and on-page SEO structure across the microsite.
- Optimised images, scripts, and stylesheets to reduce page weight and improve load performance.
- Coordinated go-live activities, UAT defect fixes, and post-launch content updates.

Project: Toruscope — WordPress Blog Website (Figma to WordPress)

Technology: Figma to WordPress, WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, MakeStories.io

- Converted the approved Figma design into pixel-accurate HTML/CSS templates and built them out as a fully responsive WordPress blog website.
- Built blog listing, category, and single-post templates with pagination and dynamic content loading.
- Created web stories using MakeStories.io and integrated them for display on the website.
- Used custom fields and WP_Query-driven modules to keep content sections client-editable.
- Applied on-page SEO, caching, and image optimisation to improve search visibility and page speed.
- Provided post-launch maintenance including plugin/core updates and security hardening.

Project: SUD Life — HTML Emailers & Interactive Quiz Game

Technology: HTML5, CSS3, table-based email markup, Mozilla Thunderbird, Microsoft Outlook, JavaScript, jQuery, PHP, MySQL, AJAX

- Created responsive HTML emailers for SUD Life communications using table-based, inline-styled markup for maximum email-client compatibility.
- Guided and mentored junior developers on emailer coding standards, structure, and common cross-client pitfalls.
- Reviewed junior developers' emailer code, provided corrections and feedback, and signed off builds before client delivery.
- Used Mozilla Thunderbird to dispatch emailer code as live test mails and validate actual inbox rendering.
- Verified rendering in Microsoft Outlook alongside webmail clients to confirm the emailer displayed correctly on both, fixing broken layouts, spacing, and font issues before delivery.
- Built an interactive quiz game for the client's internal employee engagement and fun activities as a standalone web application.
- Developed the question engine, countdown timer, scoring logic, and result screens in JavaScript/jQuery.
- Designed the MySQL schema for questions, options, answers, participants, and score records.
- Implemented AJAX-based question fetch and answer submission for a seamless, refresh-free experience.

- Developed participant registration with validation, duplicate-entry checks, and secure data storage.
- Built an admin view to review and export participant responses, scores, and leaderboard data.
- Made the game fully responsive and tested it across devices and browsers.

Project: Fab Habitat — Shopify Store Customisation & Emailers

Technology: Shopify (Liquid), HTML5, CSS3, JavaScript, jQuery, Responsive HTML Emailers

- Customised the Shopify theme header and footer, including mega-menu, navigation, and mobile drawer behaviour.
- Modified Liquid templates, sections, and snippets to meet brand, merchandising, and campaign requirements.
- Developed responsive HTML email templates and validated rendering before campaign delivery.
- Used table-based, inline-styled emailer markup to guarantee consistent cross-client display.
- Handled product and collection page tweaks, banner updates, and recurring campaign-driven store changes.

Project: Soulfoods — Shopify E-Commerce Website (Maintenance & Enhancements)

Technology: Shopify (Liquid), HTML5, CSS3, JavaScript, jQuery

- Provided ongoing maintenance and enhancement support for an existing Shopify storefront of a food and beverage brand.
- Implemented multiple pack-size and jar-size purchase options using Shopify variants with dynamic price and image switching.
- Updated product, collection, and cart templates in Liquid for content, layout, and merchandising changes.
- Handled banner updates, product and content changes, and campaign-driven storefront updates.
- Troubleshooted and resolved storefront issues raised by the client, including responsive and cross-browser display defects, within agreed turnaround times.

Project: Raipur Green Energy — WordPress Website with Custom Agent Portal

Technology: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, REST API integration, AJAX, JSON

- Developed a corporate WordPress website with a custom agent registration and login module.
- Built custom PHP/MySQL registration, authentication, and session handling outside the standard WordPress user flow.
- Integrated a third-party vehicle REST API (APIMall) to fetch and display vehicle details dynamically on the site.
- Handled API requests and responses, JSON parsing, error states, and loading indicators using AJAX.
- Implemented role-based access so that registered agents could view restricted content and downloadable documents.
- Developed form validation, secure password handling, and automated email notifications for registration and approval.
- Built an admin interface for reviewing, approving, rejecting, and managing agent registrations.

Project: Mandaala — WordPress Website

Technology: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery

- Developed the website on WordPress using theme elements combined with custom-coded sections.
- Extended the base theme with custom page templates, widgets, and additional content blocks.
- Implemented custom interactive features beyond the theme's built-in capability.
- Ensured responsive behaviour and cross-browser consistency across all key components.
- Handled content population, media optimisation, and production deployment.

Project: BookaChange — WordPress Website (Ongoing)

Technology: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Ongoing development of the BookaChange WordPress website across phased feature releases.
- Built and iterated responsive page templates and reusable content sections.
- Implemented enquiry and booking forms with validation and automated email responses.
- Coordinated with design and content teams for regular feature additions and content updates.
- Provided continuous maintenance, bug fixing, and performance/SEO improvements.

Project: Sydler India, Micro Plastics India & Techmor — WordPress Development and Maintenance

Technology: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Developed a fully responsive WordPress website for Sydler India from design handover to deployment.
- Delivered WordPress development for Micro Plastics India, including custom sections, forms, and content structures.
- Managed ongoing maintenance for Techmor — content updates, plugin/core upgrades, backups, and issue resolution.
- Handled routine SEO updates, broken-link fixes, uptime checks, and page-speed improvements across maintained sites.
- Acted as single point of contact for client change requests, delivering within agreed turnaround times.

Project: Shridutt — WordPress Website Maintenance & Compatibility Fixes

Technology: WordPress, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, custom meta types

- Took over maintenance of an existing WordPress website affected by broken functionality and intermittent downtime.
- Diagnosed PHP and WordPress version compatibility issues that had caused theme components to stop working.
- Resolved the compatibility failures and stabilised the site, eliminating the recurring outages.
- Built custom meta types and page sections to replace the theme components that were no longer supported.
- Retested affected templates across browsers and devices to confirm consistent behaviour after the fix.

Project: Fourth Partner Energy — WordPress Website Troubleshooting & Hosting Advisory

Technology: WordPress, PHP, MySQL, IONOS hosting, server and environment diagnostics

- Assigned by the delivery manager as escalation point for a live WordPress website facing recurring post-launch issues.
- Reviewed and debugged the site build handed over after go-live to isolate the source of the failures.
- Audited the IONOS hosting environment against the WordPress and MySQL versions in use and identified server-level compatibility as the root cause.
- Prepared a documented set of recommended hosting and server specifications for a stable WordPress/MySQL setup and shared it with the client for verification.
- Supported the client through the hosting change, after which the website has run without recurring failures.

Assistant System Analyst — C-EDGE Technologies, Thane

Nov 2021 – Aug 2022

Project: E-KYC Platform — Production Support & Maintenance

Technology: Application Servers, WAR Deployments, SQL, UAT & Production Environments

- Provided support and maintenance for the E-KYC platform used for Aadhaar-based account creation.

- Diagnosed and resolved account-creation failures, OTP delivery issues, and biometric device errors.
- Investigated missing daily logs, traced root causes, and coordinated fixes with the development team.
- Performed scheduled and emergency server restarts and WAR file deployments on the production environment.
- Resolved login-portal issues across both UAT and production environments.
- Supported audit processes by collating and providing evidence for audit points raised by the SISA team.

Project: ECOM Platform — RuPay Payment & OTP Support

Technology: SQL, Application Servers, WAR Deployments, OTP/DLT SMS Templates

- Investigated OTP and payment failures for RuPay card transactions on the ECOM platform.
- Verified transaction, card, and customer details directly in the database to isolate the point of failure.
- Created and updated OTP SMS templates for partner banks in line with DLT approval requirements.
- Coordinated with banks and internal teams for template registration, testing, and issue closure.
- Performed WAR file deployments and post-deployment verification for the ECOM platform.

Front End Developer — Futuready Media Private Limited, Mumbai

Oct 2017 – Oct 2021

Project: PwC India (pwc.in) — Onsite AEM Engagement (2.3 Years)

Technology: Adobe Experience Manager (AEM), HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Worked onsite at PwC India for 2.3 years as the dedicated front-end and AEM developer.
- Created and revamped a high volume of pages using AEM authoring, components, and templates.
- Built forms for event registrations, downloads, and enquiries with validation and submission handling.
- Managed data dumps and bulk content operations for reporting and lead handover to business teams.
- Updated meta tags, page titles, and descriptions to support on-page SEO across the site.
- Implemented creative layouts and custom HTML/CSS/JS blocks for campaign and thought-leadership pages.
- Worked directly with client-side marketing stakeholders to translate requirements into publish-ready pages.

Project: Angel Broking — Onsite Drupal Engagement (5 Months)

Technology: Drupal, HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Deployed onsite at Angel Broking for a five-month engagement on their Drupal-based website.
- Created responsive pages and content layouts within the Drupal CMS.
- Managed blog and content updates, taxonomy, and publishing workflows.
- Implemented on-page SEO changes including meta tags, heading structure, internal linking, and URL patterns.
- Built and maintained form submissions, capturing and routing lead data to business teams.
- Resolved front-end defects and cross-browser/responsive rendering issues.

Project: Sun Pharma — Website Revamp & WordPress Multisite Development

Technology: WordPress Multisite, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Led development, testing, and maintenance for the Sun Pharma website revamp with a team of 3, delivered in 3 months.
- Rebuilt the site on a WordPress multisite architecture covering multiple regional sites.
- Mapped and migrated legacy content, media, and URL structures with redirects to preserve SEO equity.
- Developed shared and site-specific WordPress themes and templates for the multisite network.
- Set up multisite network configuration, user roles, and per-site content administration.
- Conducted functional, responsive, and cross-browser testing before go-live and handled post-launch fixes.

Project: Salaam Mumbai Foundation — Event Website

Technology: PHP, CodeIgniter (MVC), MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Built a responsive front-end for the Salaam Mumbai Foundation event website using PHP CodeIgniter.
- Delivered design, development, and testing within a 20-day deadline with a team of 4.
- Developed MVC views and integrated them with controllers and models for dynamic event content.
- Implemented registration and enquiry forms with validation, database storage, and email notifications.
- Ensured stable responsive rendering across mobile, tablet, and desktop for high-traffic event days.

Project: Multi-Client Website Development, SEO & Emailers (15+ Projects)

Technology: WordPress, Bootstrap, HTML5, CSS3, JavaScript, jQuery, PHP, MySQL, Responsive HTML Emailers

- Developed responsive websites for 15+ clients using Bootstrap and WordPress within teams of 3–5.
- Converted PSD and design files into pixel-perfect, mobile-first HTML/CSS templates.
- Built theme-based and customised WordPress sites with client-editable content structures.
- Created responsive HTML email templates for campaigns and verified rendering across major email clients.
- Handled on-page SEO implementation, content updates, maintenance, and troubleshooting across the client portfolio.
- Began the role with a two-month internship building landing pages, resolving website issues, and managing in-house sites under a Senior Developer.

EDUCATION

Bachelor of Engineering — Computer Science | Sathyabama University, Chennai | First Class | April 2016
